November 26, 2019 - You need a TI Nspire with OS 4.5.0 or earlier to boot Ndless onto it, and then you can get Tlboy or whatever it is called. In my case, I downloaded Ndless for Tlboy and now I can install it. It can work with Tlboy as well as other TI Nspires. I did this by downloading Tlboy from <https://www.ti.com/ti-com/products/desktop/downloads/tdesktop-en/tdesktop-pro/> and downloading Ndless from here [http://www.ndless.org/downloads/ti\\_boy\\_ndless/index.php](http://www.ndless.org/downloads/ti_boy_ndless/index.php) I downloaded Ndless, installed it and started installing Tlboy. In this case, I created a new Tlboy project to start doing things, but I wanted to see it in action.
